

Module 2: Linking Health & Social Competence

Handout C: Health Snapshot Worksheet

Instructions: In the column on the left, list everything you would like to know about the health of children and families in your program. In the other column, write down where you could go for that information. This is like a written “brainstorm,” so list everything you are curious about, even if you don’t know how to find the answer.

Things I would like to know about the health of our children	Sources of information
