

Dear Review Team Members:

There was a typo in the prompt under Transportation Services compliance question 2R. The compliance question inquires into the training of bus monitors, but the prompt incorrectly asks about the training of the bus driver.

The prompt should read, “Ask the bus **monitor** to describe the training he or she received on child boarding and exiting procedures, use of child restraint systems, required paperwork, emergency and evacuation procedures, use of special equipment, child pickup and release procedures, and pre- and post-trip vehicle checks.”

A new version of the Protocol, with this correction, is now posted on the ECLKC. The change will also be made in an upcoming release in the Monitoring Software. In the meantime, please review this question using the above corrected wording of the prompt.

Thank you!
