

Making a Head Start Hand Waving Flag

You can order hand flags online. You can also create Head Start hand flags yourself with a printer and some wooden dowels – 1/8" diameter dowels are best—and double-sided tape. Download the template, "Head Start Hand Flags."

Directions:

1. Cut each flag along the cut marks, with a 1.75" space on the left of the flag to wrap around the dowel.
2. Using double stick tape, place two strips of tape lengthwise at the top and bottom, and fold the flag over the wooden dowel. The tape secures the dowel and both sides of the paper.

All this makes for a sturdy flag that will withstand one night of waving fun!
