

Number Relationships: All Together

Teacher: Now, I will write seven. Seven girls. Now, when you get older, you're going to have to put a plus sign like this, and they'll say there's eight boys and seven girls. How many are there all together? So would everybody stand up, and we'll count how many there are all together. Look how nice Christopher's standing up in his home spot. Great job. You ready? Everybody help me.

Teacher and children: One, two, three, four, five, six, seven, eight, nine, ten, eleven, twelve, thirteen, fourteen, fifteen.

Teacher: Fifteen, I think. How many?

Children: Fifteen!

Teacher: So I'm going to write $8 + 7$ is 15...

Child: Children.

Teacher: Children.
