

Teacher Appreciation Week 2015

Dr. Blanca Enriquez: Hello, teachers. I believe children are priceless; as are you, the passionate professionals who choose to work with them. You are the heart of Head Start who brings to life our mission. In addition to individualized instruction, you go beyond by creating an environment where inspiration thrives. Like Socrates, you set the stage for generations of thinkers. Like an artist, you mold the social and emotional development of our nation's youngest and most malleable minds. You, teach families to fan the ember of inquisitiveness into a flame of life-long learning. As the grandmother, abuelita, or elder gives soul to the family, so are you nurturing and guiding the future of our infants, toddlers, preschoolers and their families. Thank you for creating the safe and loving environment where our children are not only allowed, but encouraged, to thrive!
