

Children with Special Health Care Needs Case Scenario

Case Scenario 1: Anthony Deon

Anthony Deon is a three-year-old boy. A year ago he had a seizure with a high fever and recovered completely. This past week, he had another seizure with a fever that required hospitalization. This seizure lasted a long time and he had several seizures, one right after the other. The family has two new medications for Anthony to have available at the program in case of fever or seizures.

He is now ready to return to your program. He has a new Care Plan and medications.

CARE PLAN FOR CHILDREN WITH SPECIAL HEALTH NEEDS

-To be completed by a Health Care Provider-
