

Marvelous Explorations through Science and Stories (MESS): Curiosity, Questions, and Vocabulary

(links for viewing and download at end of transcript)

Terri Harper: Science is very important early childhood education because it allows the child to be curious. He can ask questions; he can help find answers. And if the teacher doesn't know the answer, together they partner to find the answer to those questions. I've seen science make a difference for children. I've entered classrooms where the vocabulary is a mile long. They're so excited when you come into the classroom. They can't wait to show you the books. They can't wait to show you what they have done with the science activities.
