

Marvelous Explorations through Science and Stories (MESS): Incorporating Science

(links for viewing and download at end of transcript)

Anne Crowell: It was the museum staff, the library staff, and our Head Start instructional staff that came together to really help the teachers to understand and to feel comfortable with the science -- introducing science into their classrooms. It took a lot of training; it took a lot of meetings and conversations with teachers, a lot of modeling, and that's why I feel that this experience was so positive for our Head Start program. The modeling that came with this project actually made the difference in how the teachers accepted it and how it was promoted in the home.

Elba Carrillo: The first time I was both excited and scared, because there are a lot of things that I didn't know about science and I was scared to make mistakes or don't teach the right way. But when we started going to trainings and we get all the information and all the help from the science program, I feel comfortable doing that.
