

Marvelous Explorations through Science and Stories (MESS): In-Depth Exploration

(links for viewing and download at end of transcript)

Cozette White: I've noticed more in our classroom, since we've added the science focus to it, that the kids are more into staying in one area and playing with something, continuing it. They bring it back up again. They want to do it over and over, or they come up with a new way of doing it. So whether it's -- even simple as building something, then they've learned the new design or new way to do it.

Or if it's mixing things, they really get into adding this to make something else -- you know, not just like adding two colors, but adding the fluids together or making the different bottles or the sound shakers that work for them.
