

## 2015-2016 Head Start Program Information Report - 2015-2016 PIR XML Import Format

### 2015-2016 PIR XML Import Requirements

The Office of Head Start provides a PIR XML import format for importing data files directly into a 2015-2016 PIR in HSES. This enables Head Start Grantees and Delegates to import data from other vendor systems that generate PIR XML format compliant Import files.

Import files configured in accordance with the 2015-2016 PIR XML Import Format for each question:

- have proper XML structure (ensuring successful import).
- are configured for the 2015-2016 PIR Form questions (ensuring question alignment).
- are ready to import (ensuring data integrity).

The 2015-2016 PIR XML Import Format has had changes since last year's PIR:

- **Section A, B, C:** The (*XML Tag Detail or PIR Question Text*) for 250 XML Question Tags were refined to improve clarity and alignment with the PIR Form.
- **Section A:** Ethnicity and Race questions were merged into a new matrix (2016-A.25), which resulted in 36 new and renumbered elements from A.25-A.30.
- **Section B:** Ethnicity and Race questions were merged into a new matrix (2016-B.12) and new Family and Community Partnerships Staff Qualifications questions (B.24 and B.25) were added, which resulted in 71 new and renumbered elements from B.12-B.28.
- **Section C:** New family questions (guardian status, education, services, and father involvement) were added, which resulted in 95 new and renumbered elements from C.36-C.63.

The 2015-2016 PIR XML Import Format specifications and supporting details are listed below in the following sections.

2015-2016 PIR XML Import Specification

The PIR Import Format is comprised of three sections:

**XML Header Tag Section:**

Common XML Header definitions, PIR Start - Schema LocationTag, Grant Number, Program Number, and PIR Year.

**Question Tag Section: -**

XML Answer Tags for each 2015-2016 PIR Question indicating the Answer Tag Type used by the question.

Question Tags begin at Line 7 and are closed with the XML Footer Tag.

Question Number elements must be exactly as shown, <Question questionNumber="A.00.a"> , incorrect 'questionNumber' tags will result in errors.

**XML Footer Tag Section:**

PIR End Tag

The XML Tags and layout are listed below for each section:
