2016-2017 PIR XML Import Requirements

The Office of Head Start provides a PIR XML import format for importing data files directly into a 2016-2017 PIR in HSES. This enables Head Start Grantees and Delegates to import data from other vendor systems that generate PIR XML format compliant Import files.

Import files configured in accordance with the 2016-2017 PIR XML Import Format for each question:
- have proper XML structure (ensuring successful import).
- are configured for the 2016-2017 PIR Form questions (ensuring question alignment).
- are ready to import (ensuring data integrity).

The 2016-2017 PIR XML Import Format has had no changes since last year’s PIR:
- There are no changes to any questions this year.
- The only change to the XML format is to ensure that the value in the program year tag is 2017. (<ProgramYear>2017</ProgramYear>)

The 2016-2017 PIR XML Import Format specifications and supporting details are listed below in the following sections.
