

Head Start A to Z Communication Resources

Effective communication is key to the success of a program in meeting the needs of children and families. There are many facets of communication in the workplace, and some have legal and cultural implications. This list of resources is not exhaustive, but it is a starting point for delving deeper into a topic or piece of communication. Many of these resources are one- or two-page overviews available on the Internet. As always, it is important that you check with your regional office, funders, state offices, and human resources advisors to ensure that you are complying with expectations, regulations, and laws.

Communication Skills and Tips

Given the many available modes for communicating (e.g., email, texting, voicemail, etc.), it is important to choose the right one and to use it effectively. Finding the time and focus to connect and truly listen to others is also important, as effective listening builds relationships, resolves conflict, ensures accuracy, improves efficiency, and decreases stress.

Marketing

Nonprofit marketing uses for-profit marketing strategies to reach out to the community and garner involvement and support. Its focus is usually fundraising, but it can extend to much more than that; for example, to recruiting families and volunteers, to connecting with potential partners, and to celebrating successes in order to strengthen a program.

Social Media

Social media (Facebook, Twitter, YouTube, etc.), computers, and smartphones have made communication among individuals and groups easier and more fluid. These tools can produce both positive and negative effects on your organization. The positive impacts may include an increase in donors, volunteers, and enrollment. The negative may involve tarnishing your program’s reputation and could even have legal ramifications. It is strongly recommended that all organizations develop a social media policy as it pertains to marketing and human resources (HR). As with other HR-related policies, it is important to get legal advice to ensure that your organization is in compliance with pertinent labor laws and union contracts.

Labor Laws and Regulations

Federal laws, particularly those having to do with discrimination, affect communication in the workplace (for example, sexual harassment laws). It is your legal and ethical responsibility as an employer to ensure compliance with all laws. Your state labor office may have additional laws that you must be aware of to ensure a nonhostile work environment.
