How to Choose a Mask:

Fabric:
Use a cloth mask that has two or three layers of tightly woven fabric or a tightly woven fabric or a disposable mask.

Fit:
Choose a mask that prevents air from leaking out of the top of the mask. Make sure it fits snugly and covers the nose (nostrils), mouth, and chin.

Double Mask:
For adults in need of extra protection, wear a disposable mask under a cloth mask; or a multi-layer cloth mask with a filter that is changed daily.

Comfort and Breathability:
Choose masks that make it easy to breathe. Masks with pleats or folds expand to improve fit and air flow.

Special Needs:
When interacting with children with hearing impairments or disabilities, consider wearing cloth face coverings with a clear plastic panel.

Why wear a mask? It protects you and others from COVID-19.
