Established in 1965, Head Start promotes school readiness for children in low-income families by offering educational, nutritional, health, social, and other services. Since its inception, Head Start has served more than 31 million children, birth to age 5, and their families. In 2013, Head Start was funded to serve nearly one million children and pregnant women in centers, family homes, and in family child care homes in urban, suburban, and rural communities throughout the nation. (More on Head Start)

Throughout this Fact Sheet, unless otherwise specified, the term "Head Start" refers to the Head Start program as a whole, including: Head Start services to preschool children; Early Head Start services to infants, toddlers, and pregnant women; services to families by American Indian and Alaska Native (AIAN) programs; and services to families by Migrant and Seasonal Head Start (MSHS) programs.

The term "funded enrollment" refers to the number of children and pregnant women that are supported by federal Head Start funds in a program at any one time during the program year; these are sometimes referred to as enrollment slots. Funded enrollment numbers include enrollment slots funded by State or other funds when used by grantees as required nonfederal match. States may provide additional funding to local Head Start programs which is not included in federal Head Start reporting.

The term "cumulative enrollment" refers to the actual number of children and pregnant women that Head Start programs serve throughout the entire program year, inclusive of enrollees who left during the program year and the enrollees who filled those empty places. Due to turnover, more children and families may receive Head Start services cumulatively throughout the program year, all of whom are reported in the Program Information Report (PIR), than indicated by the funded enrollment numbers.

**Federal Funding**

The Congress of the United States authorizes the amount of federal spending for Head Start each year. The Head Start program is administered by the Administration for Children and Families (ACF) within the Department of Health and Human Services (HHS). Federal grants are awarded directly to public agencies, private nonprofit and for-profit organizations, tribal governments, and school systems for the purpose of operating Head Start programs in local communities.

**Head Start Federal Funding**

Support Activities

Appropriation

Training and Technical Assistance $189,330,000
Research, Demonstration and Evaluation $18,928,000
Monitoring/Program Review $39,749,000
Program Support $23,332,000
Transition Funding for Designation Renewal System 2 $23,561,000
Subtotal $294,900,000

TOTAL 1 $7,573,095,000

1 The total above represents the funding available to the Head Start program after a rescission, the sequestration reduction of 5.27%, and the amount reduced under the Secretary’s transfer authority. The initial appropriation was $8,002,044,000.
2 The “Transition Funding for Designation Renewal System” refers to funds available to minimize any disruption in services when there is a change in provider as a result of the Designation Renewal System (DRS).

Federal Funding and Funded Enrollment by State

The Head Start program serves children, families, and pregnant women in all 50 states, the District of Columbia, and six territories. The table in this section presents the total allocations and funded enrollment of Head Start programs in each state and territory.

American Indian and Alaska Native (AIAN) funding is awarded to American Indian and Alaska Native tribal governments. AIAN programs operate in 26 states, and in some cases their services cross state lines. Migrant and Seasonal Head Start funding and funded enrollment are shown as one total, as this program supports children and families who receive services in various states during the year. Thus, federal funding and funded enrollment for these services cannot simply be attributed to individual states.

<sup>1</sup>AIAN funding is awarded to American Indian and Alaska Native tribes. For reference, the funding and enrollment has been split out by the state in which the tribe is headquartered. Some tribes serve children across state lines.

**Program Year Statistics**

Each year, Head Start programs are required to submit Program Information Reports (PIRs) on the services they have provided to children and families throughout the program year, including child, family and staff demographics and program characteristics.

For a copy of the PIR form, detailed reports and data sets for the 2013 PIR and prior years, and for further information, please visit: [http://eclkc.ohs.acf.hhs.gov/pir](http://eclkc.ohs.acf.hhs.gov/pir).
Program Characteristics:

- Forty-three percent of grantees operated Head Start preschool services only.
- Thirteen percent of grantees operated Early Head Start (EHS) services only.
- Forty-four percent of grantees operated both Head Start and Early Head Start services.

Most Head Start preschool services were provided in center-based settings that, based on local design, vary in the number of days per week and hours per day classes are in session. About half of EHS services were provided in center-based settings, and half were offered in home-based program settings.
Child and Family Demographics:

Head Start programs cumulatively served 1,130,000 children ages birth to 5 and pregnant women throughout the 2012-2013 program year.

Cumulative Enrollment by Age

Head Start served a diverse group of children, families, and pregnant women. Thirty-seven percent identified themselves as Hispanic/Latino, and almost 29 percent were Black/African American.

Families were asked to self-identify both an ethnicity and a race category based on U.S. Census Bureau measures. For example, a family that identifies their child as Black and Cuban was counted in the "Black or African American" race category for the race question and counted in the "Hispanic or Latino" category for the separate question on ethnicity.

Race

- White, 42%
- Black or African American, 29%
- Biracial or Multi-Racial, 9%
- Asian, 2%
- American Indian/Alaska Native, 4%
- Unspecified/Other, 13%

Ethnicity

- Non-Hispanic/Non-Latino Origin, 63%
- Hispanic or Latino Origin, 37%

Twenty nine percent of participants were from families that primarily spoke a language other than English at home. Nearly 25 percent of participants were from families that primarily spoke Spanish at home.
Services to Children and Families:

Head Start programs work with families to help ensure children have access to needed services and resources. The number of children who received immunizations increased from the beginning of the program year to the end of the program year. Also, more families had health insurance and medical and dental homes for their children at the end of the 2012-13 program year than at the beginning.

Head Start programs work with families to ensure they have the means to obtain health insurance, services for children with disabilities, adequate housing, job training, and more. In FY 2013:

- Most children had public health insurance. At the end of the program year, 89 percent of children were enrolled in Medicaid, CHIP, or a state funded child health insurance program.
- Twelve percent of Head Start cumulative enrollment was made up of children with disabilities, defined as children having special plans under the Individuals with Disabilities Education Act (IDEA). In comparison, nationally, about three percent of infants and toddlers and six percent of preschool-age children have identified disabilities. Head Start serves a greater percentage of children with disabilities than found in the overall population.
- Among pregnant women enrolled in EHS, approximately 91 percent received prenatal education on fetal development and 20 percent had medically high risk pregnancies.
- Head Start served about 1,034,000 families cumulatively throughout the program year. The number of families served is a little less than the number of participants served, since some families have more than one child enrolled.
- Approximately 47,000 families served during the enrollment year experienced homelessness. Of those families, 34 percent found housing during the program year. Nearly 108,000 Head Start families received housing assistance such as subsidies, utilities, and repairs.
- Approximately 245,000 families, or 24 percent, received services related to job training and adult education such as GED programs and college selection.
Program Staff:

Head Start programs employed and contracted with 250,000 staff. Parents of current or former Head Start children made up 23 percent of Head Start staff.

- More than 1.2 million adults volunteered in their local Head Start program. Of these, 818,000 were parents of Head Start children.
- About 122,000 staff members provided child development services to children, including teachers, assistant teachers, home visitors, and family child care providers.
- Among child development staff, 30 percent were proficient in a language other than English.
- Sixty-six percent of all Head Start center-based preschool teachers had a Baccalaureate degree or higher in early childhood education, or in a related field with experience. The Head Start Act specifies that 50 percent of center-based preschool teachers nationwide should have these credentials by 2013.

### Center-Based Preschool Teachers' Degrees

- **BA, 54%**
- **Associate, 28%**
- **CDA, 4%**
- **No Related Cred/Deg, 2%**

66 percent of preschool teachers have a BA or higher in ECE/related field.

94 percent of preschool teachers have an AA or higher in ECE/related field.
Head Start Federal Funding and Funded Enrollment History

The graphs and tables below depict the last 40 years of Head Start federal funding and funded enrollment history.
The American Recovery and Reinvestment Act (ARRA), enacted in February of 2009, appropriated $2.1 billion to the Head Start program and was available for obligation over a two-year period. These funds are displayed on the graph in green. ARRA funds supported a variety of activities, including for example a cost-of-living adjustment, quality improvement, and an expansion of Head Start and Early Head Start enrollment by 61,000 children, families, and pregnant women. This enrollment increase is also displayed on the graph in green. The funding was primarily for one-time purposes, but Congress provided funding in subsequent appropriations to continue a portion of the funding spent on a cost-of-living adjustment. Additionally, all of the funding necessary to sustain the expansion of Head Start and Early Head Start services to 61,000 additional funded enrollment slots for children, families, and pregnant women was appropriated across fiscal years 2011 and 2012.
